City of El Cajon**

	EOW	Check	Verify
Adjacent streets, names, widths, centerlines			
Pavement sections meet City Standards			
Driveway types and widths shown on plan, CLR to PL			
Street Elevations			
Property location identified (street address or Assessor's Parcel No. or other specific legal or tie).			
Required dedications and easements granted and shown on plan.			
Existing elevations and/or contours to 10'± onto adjacent properties. (Sufficient to determine existing dir. of drainage on subject and adjacent properties.)			
Swales & Typical section (earth swales to have 0.25 min. depth, 2:1 max. slopes).			
Other construction (walls, fences, paving, curbs, etc.)			
All pertinent facilities properly labeled in legend.			
Proposed elevations and/or finish contours			
Proposed direction of drainage			
Check storm drain piping, min slope 0.5%; min 18-inch RCP required in Public ROW			
Grade check throughout for satisfactory drainage (conc. min. 0.5%, AC min. 1%, earthen swales min. 1%)			
<u>Stormwater Review:</u>			
Catch basin (specified size and type) and SDRSD D-27 min. 2 x 3" SW underdrains required when draining 100' or deeper lots (except in subdivisions); SDRSD D-25 preferred in general			
Turn 4th blocks at ground level or provide weepholes to allow drainage through walls (when required).			
Plan and drainage facilities in compliance with drainage study (if required).			
General Construction Activity Storm Water Permit required (if over 1 acre) from the State Water Resources Control Board. Submit copy of N.O.I., WDID#, and SWPPP.
